

Everything You've Always Wanted to Know About Silicone in One Word:

HEXPOL

HEXPOL is the number one provider of custom rubber and TPE compounds. So why not turn to us for silicone elastomers as well? Our silicone is custom formulated and mixed for your application.

Leverage HEXPOL's heritage in organic rubber compounding, defined by industry-leading innovation, for the best silicone rubber compounds, technical service, and field support available.

We've got the right silicone solution for an array of industries and applications:

- All types of silicone and fluorosilicones
- Formulary with hundreds of compounds
- An array of physical forms
- Silicones of almost any color
- Compounds that meet typical specifications and standards

HEXPOL's Request For Quote process helps our chemists and technical specialists deliver the right silicone formulation with the exact properties for your application.

We have three state-of-the-art silicone mixing facilities strategically located around the country to provide personalized service and timely product delivery, wherever you are.
